

Biology Vocabulary - Week 1

Across

4. The "3rd" polymer
7. A polysaccharide that forms glucose on hydrolysis
8. The group of Fats, Oils, and Waxes
9. Considered as "the wall of building blocks"
14. The group that is made of Amino Acids
15. The monomer that makes up Nucleic Acids
16. The main constituent of plant cell walls

17. The amount of energy that the reactants will have to absorb
18. The group of sugars and starches
19. The monomer that makes up Proteins

Down

1. Liquid obtained by the fermentation of glucose
2. Found in Nucleic Acids' DNA and RNA
3. Are not proteins, not affected by temperature, and does not require water

5. The process of reacting monomers
6. The monomer that makes up Carbohydrates
10. Considered as "the building block(s)"
11. Are proteins, does require water, and optimum temperature
12. The monomer that makes up Lipids
13. The group that store and transmit hereditary or genetic information
