

Name: _____

Date: _____

Biology Amber Tolbert

Across

1. Manufacture proteins for the cell
2. A model that describes the structure of a cell
4. Has a higher water molecule concentration than the cytoplasm
12. Packages proteins for the cell
13. Has equal amount of water molecules on both sides

14. Transfers materials through the cell

15. Cell that contains a nucleus

Down

3. The movement of molecules from high to low concentration
5. A cell with no nucleus
6. All cells come from other living cells
7. Works as a clean up crew for the cell

8. Power house of the cell

9. The movement of water over a selectively permeable membrane

10. Has lower water molecule concentration than the cytoplasm

11. Holds organelles in place
