

Name: _____

Date: _____

Biology

Across

5. what does the lipase enzyme turn fat into?

7. what is it called when enzymes join with a substrate?

9. What makes Bile ?

10. where water is reabsorbed into the blood?

12. what chain do enzymes attack?

13. where digested food is absorbed into the blood?

15. what acid is enzymes made up from?

16. what colour is bile?

17. what do enzymes break starch down into?

Down

1. where bile is stored?

2. what breaks down your food?

3. where does the substrate fit into?

4. whats protein used for?

6. what part of the digestive system produces enzymes?

8. what is another word to call a enzymes ?

11. what's carbohydrates used for?

14. what's it called when the temperature for the enzyme reaction isn't high enough?
