

# Biology

**Across**

- 2. Not living that influence the ecosystem
- 6. Eats herbivore
- 10. In the highest trophic level
- 13. This shows mass of living
- 14. Provide food
- 15. Food
- 16. A order that energy path through the trophic level
- 18. Eater
- 20. Eat multiple things
- 22. A community where there are many food chain

- 23. Relationship between water and food
  - 24. Bacteria and fungi that recycle the dead
  - 25. A relationship where one benefits and one harmed
- Down**
- 1. Second trophic level
  - 3. This shows population of organism
  - 4. Living factor
  - 5. The position of organism in a good chain in the order of energy transfer

- 7. This shows the energy at each level
- 8. Recycle of energy
- 9. Third trophic level
- 11. The relationship between two organism
- 12. Lions
- 17. Eat producer
- 19. a relationship where one organism and one is neutral
- 21. A relationship where two organism help each other and both benefits
