

Name: _____

Biology revision

Across

5. This organelle controls the activity of the cell

8. what organelle controls movement in and out of the cell

9. This organelle of a plant cell is needed for photosynthesis

10. This plant cell transports water and consists of dead cells

Down

1. this organelle of plant and animal cells is where the proteins needed for the cell are made

2. The extra protective layer on the exterior of a bacterial cell only

3. What organelle controls movement in and out of the cell

4. the collective term for cells with no nucleus

6. The process of how mitochondria release energy

7. Which organelle only found in plant cells is a large space containing cell sap
