

Biology topics 4/5

Across

- 5. What links light intensity and distance?
- 8. You respire more when you do what?
- 13. Controls unconscious activities
- 14. Not enough Oxygen
- 15. What goes through the CNS?
- 16. Maintaining a stable internal environment

- 18. Responsible for muscle coordination in the brain

Down

- 1. What type of feedback counteracts changes?
- 2. What connects Neurones?
- 3. In the brain, what's responsible for Consciousness, intelligence, memory & language?
- 4. Name 1 limiting factor of rate of photosynthesis
- 6. Anaerobic respiration in yeast cells is called what?

- 7. Glucose is combined with what to make amino acids?

- 9. ALL of the chemical reactions in an organism
- 10. Process of transferring energy from glucose
- 11. Name 1 way Plants use Glucose
- 12. Photosynthesis produces what using light?
- 17. Needs plenty of Oxygen
