

Name: _____

Date: _____

Biomolecules and Enzymes

Across

3. The substrate fits into the _____ site of an enzyme.
5. Enzymes change the _____ of chemical reactions
7. Sugars, function - energy and structure. Ex - starch
9. Suffix that means sugar
10. The molecule that the enzyme acts on

Down

1. Nucleotides, function - carry genetic information. Ex. DNA and RNA
2. Fatty acids, function - energy and protection. Ex - fats and oils
4. Suffix that means Enzyme
6. Amino acids, function - growth and repair. Ex - meat, enzymes
8. Changes the rate of reactions
