

Blood

Across

5. An absence of strains in an otherwise continuous bloodstain pattern
 8. A drop of blood from which a wave, cast-off, or satellite spatter
 9. A surface upon which blood has been deposited
 10. A bloodstain pattern which results from blood dripping into blood
 11. The path of the blood drop, as it moves through space, from the impact site to the target
 12. Blood which has been reduced to a fine spray, as a result of the energy or force applied to it

13. That blood which has been dispersed as a result of force applied to a source of blood.

15. Blood directed back towards the source of energy or force that caused the spatter

Down

1. The directionality of a bloodstain or pattern which indicates the direction the blood was traveling when it impacted the target surface
 2. Blood which travels in the same direction as the source of energy or force which caused the spatter

3. The acute angle formed between the direction of blood drop and the plane of the surface it strikes
 4. Evidence that liquid blood has come into contact with a surface.

6. That point where force encounters a source of blood
 7. The pointed or elongated stains which radiate away from the central area of a bloodstain

14. The deflection of blood after impact with a target surface that results in straining of a second target surface.

Word Bank

Drip Pattern	Misting	Forward Spatter	Parent Drop	Target
Angle of Impact	Spine	Void	Spatter	Directionality
Back Spatter	Bloodstain	Impact Site	Ricochet	Flight Path
