# Bonding

## Across

3. strong electrostatic attraction between oppositely charged ions is a what bond?
4. what is ment when a metal can be made into wire?
7. strong electrostatic attraction between 2 nuclei so two atoms can have a full outer shell, is a what bond?
9. one property of a Giant covalent compounds is it's?
10. Hydrogen atoms from intermolcular forces to what other atom?

## Down

1. When one atom donates 2 electrons in a covalent bond it's called a what bond?
2. An Example of a giant covalent bonds are?
5. Metallic bonds are what only?
6. How many types of intermolecular forces are there?
8. Iodine molecules forming weak intermolcular forces is and ecample of what force?
