# Branches Of Science Word Study Project

## Across

1. The study of chemical substances and vital processes occurring in living organisms
3. The branch of biology that deals with the relations of organisms to one another and their physical activity
5. Foods and meats grown or raised without chemicals or pesticides
6. A physical phenomenon produced by the motion of electric charge, resulting in attractive and repulsive forces between objects

8. The branch of science that deals with celestial objects, space, and the physical universe as a whole
9. The study of viruses and viral diseases
11. The study of animals
12. The study of the atmosphere
13. The branch of physics that deals with the interactions of electric, magnetic, and mechanical phenomena
14. The study of the structure and relationship between body parts

15. The branch of science that deals with the physical and biological properties and phenomena of the sea

## Down

2. The study of stars and other objects in space, and the way they moved over time
4. The branch of zoology concerned with the study of insects
7. The branch of applied mathematics dealing with motion and for forces producing motion
10. Earth's physical structure and substance, its history, and the processes that act on it
