

C1L3 Cellular Respiration

Across

8. step 2 and 3

9. O₂

10. Usable energy molecule

Down

1. takes place in yeast/bacteria

2. transforms stored energy in food into usable energy

3. occurs in muscles

4. Glycolysis

5. Provides energy for cells without using Oxygen

6. Alcohol Fermentation occurs in this

7. C₆H₁₂O₆
