

Name: _____ Date: _____ Period: _____

C2L1 Cell Cycle & Division

Across

- 3. chromosomes uncoil
- 6. cromatin coils to form cromosomes
- 7. makes a DNA copy of itself
- 8. happens in metaphase
- 10. division of cytoplasm

Down

- 1. the sequence of growth & division in a cell
- 2. splits in anaphase
- 4. chromosomes line up in the middle of the cell
- 5. chromosomes are pulled apart at the centromere
- 9. division of nucleus
