

Name: _____ Date: _____ Period: _____

C2L1 Cell cycle and division

Across

- 2. Cell's nucleus divide
- 6. Chromosomes uncoil
- 8. Chromosomes are pulled apart at the centromere
- 9. single eukaryotic cell is divided to form two daughter cells
- 10. packaged and organized structure containing most of the DNA

Down

- 1. between the first and second divisions of meiosis
- 3. Nuclear membrane disappears
- 4. second stage of cell division
- 5. series of events that take place in a cell leading to its division and duplication
- 7. is attached to a spindle fiber during cell division
