

# C4 : The Reactivity Series

**Across**

- 4. What metal is found at the bottom of the reactivity series?
- 6. A metal that is below half way in the reactivity series - if you read its name differently it sounds like it is out in front!
- 7. What Metal is at the top of the reactivity series?
- 10. Metal in the reactivity series that is often used in jewellery.

11. The least reactive metal in group 1 of the periodic table.

13. This is a non-metal which is found in the reactivity series and used to extract copper from its ore.

**Down**

- 1. Metal that reacts with water and is needed for healthy teeth and bones.
- 2. A reactive metal that burns with a bright light.

3. An unreactive metal in the reactivity series that is a favourite in the police force.

5. A metal in the reactivity series which reacts with acids. It sounds as though you might wash your dishes in it!

8. A metal in the reactivity series with the symbol Sn.

9. A reactive metal used in street lights because it gives an orange glow.

12. The ore haematite provided this metal.
