

# CELLS- organelles/function

## Across

- 2. Protein builders of the cell**  
**3. Contains chlorophyll and photosynthesis occurs**  
**7. It consists of DNA and a Nucleus**  
**9. Supports the cell and is made out of cellulose**  
**10. Controls the entry and exits of the proteins**

## Down

- 1. Consists a production of respiration and energy**  
**4. A sphere like structure in the Nucleus**  
**5. A jelly like substance**  
**6. It is the control centre of the cell (Contains DNA)**  
**8. This acts like a storage space and is filled with cell sap**
