

# CHEMIKOVICK - PRELIMS

## Across

2. potassium sodium tartrate is ----- salt  
 6. unsaturated cyclic hydrocarbon  
 8. Diabetes affects ----- part of the body  
 13. september 1-7th - national ----- week  
 15. 4-acetamidophenol  
 17. acetylsalicylic acid  
 19. soda ash  
 20. ----- is a source of oxalic acid  
 21. extensive property

22. green solvent  
 23. Deals with the knowledge and manufacture of drugs  
 25. neurotransmitter  
 26. substance that is added to ore to remove the gangue is known as  
**Down**  
 1. S.I unit of electrical conductance  
 3. arm chair, zigzag and chiral forms belong to  
 4. Colloidal systems containing liquid dispersed in a solid are called  
 5. The Cullinan is the largest

7. Calcium oxide is the largest constituent in-----  
 9. ----- is a chargeless particle of vanishingly small mass  
 10. sp<sup>3</sup>d<sup>2</sup> hybridisation  
 11. aromatic heterocyclic compound containing sulphur  
 12. molecule which shows bond order of three  
 14. chemical energy to electrical energy  
 16. The process in which pressure of the system remains constant  
 18. aromatic aliphatic ketone  
 24. Curie's discovery
