

# CPHON Review

**Across**

- 8. Jaundice is secondary to
- 10. Patients with hemophilia have a prolonged
- 11. Abdominal radiation can cause this
- 12. Potential CNS post op side effect
- 13. Complication of Thalessemia
- 14. Simultaneous clotting and bleeding

- 15. Emergency in an immunocompromised child
- 16. Most common pediatric CNS tumor
- 17. Nutritional deficits can lead to this
- 18. Grades III & IV
- 20. Patients with central lines are at risk for this

- 3. Interferes with drug penetration into the CNS
- 4. Drug that increases photosensitivity
- 5. Causes tachycardia
- 6. Severe Congenital Neutropenia can be treated with this drug
- 7. Most severe form of SCD
- 9. Uncommon symptom of pediatric CNS tumor
- 19. Highly emetogenic

**Down**

- 1. VP shunt placed to treat
- 2. Location of the brain stem
