CROSSWORD PUZZLE~SOL 6.1

Across

4. what is a tool used for measuring volume include mL and L?

6. What is a well tested concept that explains a wide range of observations?

12. What is a interpretation of an observation that is based on evidence?

16. What is a tool used for measuring length (ML, CM, M, and KM)?

17. What is a rule of nature that explains a pattern in nature?

18. What is a proven hypothesis supported by many experiments and constant data?

19. What is the amount of space taken up by an object (Liter)?

20. What is step #2 information about the topic?

22. What is it when all of the variables et changed except for one stays the same?

23. What is a possible answer to a question or problem?

Down

1. What is a standard against which other conditions can be compared?

2. what does it mean to make or create?

3. What is a forecast about what may happen in the future?

5. What is a tool used for measuring mass using kilograms?

7. What is the factor that gets changed as a result from your experiment?

8. what is the one factor that a scientist changes or manipulates?

9. What is a procedure or plan that scientists follow?

10. What is step #8 sharing the results to others?
