

Cardiology

Across

2. difference between resting and maximal cardiac outputs is cardiac

7. these fibers convey impulses to the ventricular myocardium

8. The circuit that transports blood to and from the body

11. atrial depolarization

12. Accelerates the heart rate when walls of the right atrium are stretched

13. return blood from heart

14. Amount of blood pumped by the ventricle each minute

Down

1. what blood flows from right atrium into the right ventricle through

3. ventricular depolarization

4. carry blood away from heart

5. Cavity surrounding the heart

6. Amount of blood ejected by a ventricle during a single beat

9. Pacemaker of the heart

10. ventricular repolarization
