# Celestial Objects

## Across

2. The closest planet to the sun  
6. Planet that sustains life  
9. Star clusters that are extremely luminous objects  
13. Cluster found in spiral and irregular galaxies  
15. The moon with a frozen ocean  
16. Planet that spins sideways

17. Hot core at the heart of the collapsing cloud

18. Cause of black holes

19. Surrounds the core of a star

20. Natural Satellites

## Down

1. A heavy element that stars produce

3. Longer day than year

4. A dust cloud

5. Spacecraft that explored Saturn

7. Galaxy with a spheroidal structure

8. Double dwarf planet

10. The great red spot

11. The Red Planet

12. The galaxy which the solar system belongs

14. Most widely recognized astronomical objects
