

Cell Anatomy and Physiology Project

Across

- 5. Stores needed substances
- 8. Acts like a screen to let materials pass but not others
- 9. Gel like fluid mostly made out of water
- 10. Serves as an internal delivery system for transporting cells

Down

- 1. Make protein for the cell
- 2. Help the plant make food for itself
- 3. help package and deliver materials
- 4. The brain of the cell
- 6. The power houses of the cell
- 7. Provides extra support and structure (only for one cell)

Word Bank

Vacuole
Cytoplasm
Cell Membrane
Nucleus

Ribosomes
Chloroplast
Mitochondria

Endoplasmic Reticulum
Cell Wall
Golgi Body
