

Cell Biology Cross word

Across

- 1. Organelles that produce proteins
- 6. Specialised tissue that can contract
- 7. The control centre of a cell
- 12. Extensions on the outer surface of some root cells
- 14. Organelles which get rid of wastes from the cell
- 15. Many nerve cells grouped together
- 17. A group of unicellular organisms found in ponds and soil

18. Skin

- 19. The skeleton of a plant
 - 20. The lens of a microscope closest to your eye
- Down**
- 2. The object being looked at through a microscope
 - 3. Groups of cells that perform the same function in the body
 - 4. When a scientist cuts apart dead plant or animal to study
 - 5. The building blocks of all living things
 - 8. The smaller parts of a cell

- 9. Cells that can become different types of cells under specific conditions
- 10. Made bigger
- 11. Very tiny pores in leaves
- 13. Cell division that produces two identical cells
- 16. What is seen using a microscope
