

Name: _____

Date: _____

Cell Cycle, Mitosis, and Cytokinesis

Across

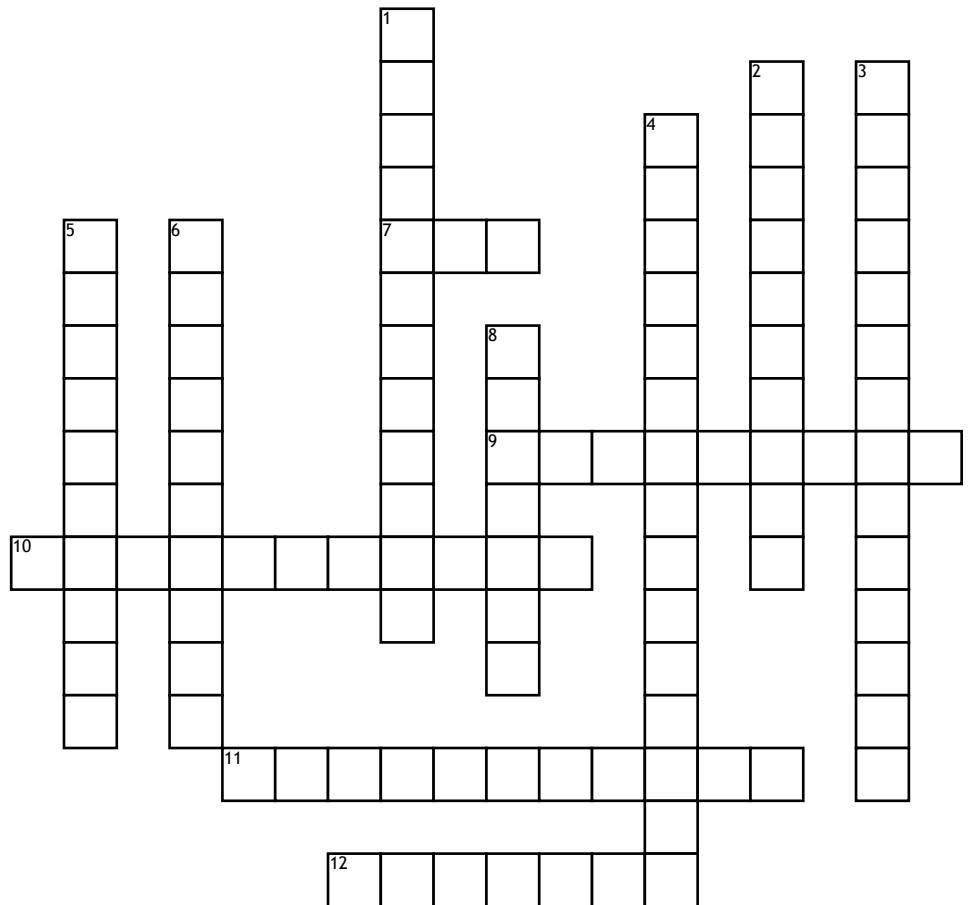

7. What is copied during S phase

9. Each half of the chromosome

10. Structure consisting of DNA coiled around proteins

11. The cytoplasm and organelles are divided among the two daughter cells

12. The phase where the cell splits into two identical daughter cells

Down

1. Important for both Unicellular and Multicellular organisms

2. G1, S, and G2

3. What occurs during the S phase

4. Prophase, metaphase, anaphase, and telophase

5. Includes the phases G1, S, and G2

6. What occurs during the G1 Phase

8. Organelle where DNA is stored
