

Cell Division

Across

2. how many parts are there to a chromosome?
 7. What organelle produces spindle fibers and helps pull chromosomes apart?
 11. How many main stages are there in the cell cycle?
 12. What process produces 2 new cells?
 13. what process produces 4 new cells?
 14. what cells contain the complete number of necessary chromosomes?

15. A cell that contains a single set of chromosomes
 16. what process produces sex cells?

Down

1. what type of chromosome has the same genes from the parents
 3. What started differentiation?
 4. what is the picture of chromosome pairs?

5. What connects to the chromosome during metaphase and pulls them apart during anaphase?
 6. What is the name of the part in the process where the cell divides into 2 daughter cells?
 8. What type of cell is completely unspecialized?
 9. What process produces normal body cells?
 10. What process does a tetrad form in?
