

# Cell Division and Reproduction

## Across

1. What creates two daughter cells?
3. Longest part of the cell cycle?
8. Drugs that treat a disease?
9. The process by which double-stranded DNA makes copies of itself?
13. 1st stage of Mitosis?

14. What causes a cell to work in an abnormal way?
15. 2nd stage of Mitosis?

## Down

2. 3rd stage of Mitosis?
4. What are rod-shaped structures that appear in a cell nucleus during cell division?
5. The series of growth and division that the cell undergo's?

6. Disease in which cells grow and divide without control?
7. The purpose for growth and repair of cells?
10. What is a mass of abnormal cells?
11. 4th and finally stage of Mitosis?
12. What is features that characterize a person?
