

Cell Organelles

Across

2. supply energy for the cell

6. stores water or nutrients

9. protein builders

10. they break-down stuff

11. DNA of the cell

12. filling of the cell

13. it directs all activities in the cell

14. makes ribosomes

Down

1. transports proteins through the cell

3. surrounds the nucleus

4. lets things in and out of the cell

5. they determine what proteins leave the cell

7. cell enclosure

8. they conduct photosynthesis
