

Cell Organelles

Across

- 2.** The cell that lacks a nucleus and membrane bound organelle.
- 5.** The smallest unicellular organisms that are prokaryotic.
- 7.** Plants and Animal cells are classified as what type of cell?

8. Gives and makes protein.

10. The cell without chloroplast, cell wall, and central vacuole.

11. A plastid that contains chlorophyll and in which photosynthesis takes place.

12. The cell that has chloroplast, cell wall, and a central vacuole.

Down

1. The substance that hold all the organelles in the cell.

3. Makes cellular energy through Cellular Respiration.

4. Blocks unwanted molecules from coming in.

6. The control center containing DNA.

9. Hold the structure.
