

Name: _____ Date: _____

Cell Organelles: Structure and Function

- | | |
|---|-------------------|
| 1. Jelly-like material the organelles are found in | A. Nucleus |
| 2. Control all cell activities. | B. Golgi complex |
| 3. Provides energy for the cell | C. Mitochondrion |
| 4. Controls the movement of materials in and out of the cell | D. Endo reticulum |
| 5. Contain enzymes which break down and digest wasted and worn out cell parts | E. Cell membrane |
| 6. Rigid structure which provides support and protection in plant cells | F. Lysosomes |
| 7. Package useful materials | G. Chloroplast |
| 8. Series of canals used to transport materials in cell | H. Cell wall |
| 9. Allow plants to make their own food | I. Vacuole |
| 10. Holds water, food and waste materials | J. Cytoplasm |
