

Name: _____

Date: _____

Cell Organelles: Structure and Function

Across

8. Jelly-like material the organelles are found in

10. Controls all cell activities

11. Holds water, food, and waste materials

12. Manufactures ribosomes

13. Controls the movement of materials in and out of the cell

Down

1. Series of canals used to transport materials in the cell

2. Packages useful materials

3. Manufactures proteins for the cell to use

4. Contains DNA and is found in the nucleus

5. Provides energy for the cell

6. Allows plants to make their own food

7. Contains enzymes which break down food and digest wastes and worn out cell parts

9. Rigid structure which provides support and protection in plant cells
