

Cell Organelles

Across

3. Jelly-like material the organelles are found in

9. Allows plants to make their own food

10. Provides energy for the cell

11. Controls all cell activities

12. Controls the movement of materials in and out of the cell

13. Packages useful materials

Down

1. Holds water, food and waste materials

2. Rigid structure which provides support and protection in plant cells

4. Contains DNA and is found in the nucleus

5. Manufactures ribosomes

6. Contains enzymes which break down food and digest wastes and worn out cell parts

7. Series of canals used to transport materials in the cell

8. Manufactures proteins for the cell to use
