

Cell Organelles Functions

Across

- 2. assist in cell reproduction
- 7. refines, modifies, and packs proteins
- 10. brain of cell; controls cell activity
- 11. site of protien synthesis and assembly
- 12. controls what goes in and out of cell

- 13. stores/holds food, water, enymes and waste
- 14. where photosynthesis occurs; plant cells only

Down

- 1. provides support and protection; only in plant cell
- 3. site of protein production
- 4. types of rna; site of protein synthesis

- 5. powerhouse of the cell; where cell respiration occurs

- 6. helps transport stuff throughout the cell; where chemical reactions occur
- 8. lipid and carb synthesis
- 9. known as garbage disposal; i a powerfl enyme; breaks down and destroys bacteria and viruses
