# Cell Structures and Functions

## Across

- 2. having a body made up of many cells
- 5. organisms made up of cells that contain a nucleus
- 6. holds structures and chemicals for the cells' activities
- 8. provides structural support in plants
- 9. all living things are made up of one or more cells; the cell is the most basic unit of organization in living things; all cells come from other living cells

- 10. stores wastes and other materials
- 11. contains DNA, which directs the cell's activities

## Down

- 1. controls flow of materials into and out of the cell
- 3. releases energy from sugars
- 4. structures that have different functions or jobs
- 7. changes energy from the Sun into energy stored in sugars
