

Name: _____

Date: _____

Cell Vocab

Across

- 2. Supporting layer around around the cell (only in plants)
- 8. Power house for the cell
- 10. Material inside of the cell membrane not including the nucleus
- 11. Process that a cell releases a large amount of material

- 12. Process when molecules move from a more to a less concentrated area
- 13. Small dense region within most nuclei, assembles proteins

Down

- 1. Modifies, sorts and packages proteins from the ER
- 3. Single or multi cellular organism and has a nucleus

- 4. Energy requiring process that moves material across a cell membrane
- 5. Helps cell maintain shape and structure
- 6. Unicellular Organism lacking a nucleus
- 7. Stores materials such as water salts proteins and carbohydrates
- 9. Breaks down lipids found in the cytoplasm
