

Cell

Across

- 1. What directs the cell's activities
- 4. Whats a lash-like appendage potrudes the cell
- 5. what is golgi complex
- 9. What structure in the cell of plants and other organisms capture energy from sunlight and convert it to food
- 11. Whats the basic unit of life
- 13. what cell structure forms passageways in which proteins and other materials are carried through the cell

- 14. Whats a small grain-like structure in the cytoplasm
- 15. What rod-shaped cell converts energy in food molecules to energy the cell
- 16. What cell boundary controls which substances enter or leave the cell

Down

- 2. Whats the rigid layer of nonliving material that surrounds the cell
- 3. What organisms cells contain nuclei
- 6. What breaks down large food particles into smaller ones

- 7. A material within the cell apart from the nucleus
- 8. What carries out a specific function within the cell
- 10. What cells lack a nucleus and other cell structures
- 12. Whats the hairlike projections on the outside of the cells
