

Name: _____

Cell cross word puzzle

Across

- 3. destroys harmful substances throughout the cell
- 4. processes and sorts protein
- 6. moves entire cell
- 11. photosynthesis
- 13. made of microtubules
- 15. makes proteins
- 16. binary fission division

17. chitin in fungi and peptidoglycan in bacteria

18. provides structural support

19. make protein

21. more than one cell

22. controls what goes in and out of the cell

Down

1. holds everything in place

2. makes lipids

5. moves liquid across cell surface

7. mitosis division

8. one cell

9. food is broken down during cellular respiration

10. transports proteins around cell

12. makes ribosomes

14. protects DNA

20. storage container for the cell
