

Cell cycle/Mitosis Vocabulary

Across

- 2. Chromosomes split apart from each other
- 4. Period of cell cycle prior to mitosis, chromosomes are replicated
- 8. The first of four stages of the cell cycle, cell grows in size
- 9. The end of mitosis, the separation of two new cells
- 10. Final stage of cell division, two nuclei are formed

Down

- 1. Second stage of cell division, chromosomes line up in the middle
- 3. The sequence of growth and division of a cell
- 5. The first stage of cell division
- 6. Duplicating or producing an exact copy of the DNA
- 7. The cell prepares itself for mitosis
