# Cells

## Across

- 3. Transports material like proteins around the cell
- 7. Digests older cell parts, food, or other objects such as bacteria
- 8. Protects and supports the cell
- 9. Controls all of the other organelles in the cell
- 10. Captures sunlight and uses it to produce food for the plant

- 11. Storage tank for food, water, wastes, or enzymes

## Down

- 1. makes protein
- 2. Packages and gives off proteins for use in and out of the cell
- 4. Supplies the cell with energy
- 5. Supports/holds the organelles
- 6. Protects the cell, and controls what enters and exits the cell
