

# Cells

## Across

**2.** Storage for plants

**5.** Takes in nutrients from cell, breaks it down, and turns into energy

**9.** Lies outside the cell membrane ( Only found in plants )

**11.** Found inside the nucleus. Starts from C.

**12.** Serves as site for protein and lipid synthesis

**13.** Protects the cells from surroundings

## Down

**1.** Modifies, sort, package proteins

**3.** makes protein

**4.** Absorbs Lights

**6.** make ribosomal subunits from proteins

**7.** A thick solution that fills each cell and is enclosed by cell membrane

**8.** Contains DNA

**10.** Digests Excess
