

# Cells

## Across

- 3.** a network of membranous tubules with the cytoplasm of a eukaryotic cell.  
**7.** is an organelle found in both animal cells and plant cells.  
**9.** It has ribosomes attached to its surface .  
**10.** Surrounds the cytoplasm  
**11.** is a membrane-bound organelle.  
**13.** DNA

- 15.** It contains the majority of the cells genetic material.

## Down

- 1.** is a membrane-bound cell organelle that contains digestive enzymes.  
**2.** Eukaryotes are organisms whose cells have a nucleus enclosed within membranes  
**4.** In organelle found in large numbers in most cells.  
**5.** is a unicellular organism that lacks a membrane-bound nuclues ,mitochondria.

- 6.** Is a thread like structure found in the nuclei of both animal and plant cells.

- 8.** a complex of vesicles and folded membranes within the cytoplasm.

- 12.** The material or protoplasm within a living cell .

- 14.** It is a protective, semi-permeable outer layer of a plant cell.
