

# Cells

**Across**

- 6. Who discovered cells?
- 8. What do plant cells use to create food?
- 10. Which organelle makes energy out of food?
- 13. What organelle in the cell helps keep other organelles in place?
- 14. Who said that all cells come from other living cells?
- 16. What theory states that all living things are composed of cells?
- 17. Which organelle is used for storage?

- 18. What do all living things have?
  - 19. What do different tissues and organs working together form?
  - 20. The heart is an ?
  - 22. Who used a simple microscope?
- Down**
- 1. What organelle makes proteins?
  - 2. Similar cells are grouped together to form a ?
  - 3. What kind of microscope uses a beam of electrons to use magnify an image?

- 4. Which cell contains a cell wall?
- 5. What is the highest level of organization?
- 7. What are animal cells?
- 9. Who said that all plants have cells?
- 11. What is known as the brain of a cell?
- 12. What are organisms that have more than one cell called?
- 15. What is the organelle that only plant cells have?
- 21. Who said that all animals have cells?
