

Name: _____

Date: _____

Cells

Across

- 3. the control center of a cell
- 6. liquid-filled spaces in the cytoplasm
- 7. rice-shaped structures that produce energy for a cell
- 9. the portion of the endoplasmic reticulum that is free of ribosomes
- 10. rigid structure that surrounds the cell
- 11. a network of long protein strands in the cytosol that helps support the cell

Down

- 1. an organelle containing digestive enzymes
- 2. green structure in a plant cell that contains chlorophyll
- 4. an organelle that functions in the synthesis of proteins
- 5. the portion studded with ribosomes
- 8. all the living materials inside a cell except the nucleus
