

Name: _____

Date: _____

Period: _____

Cells

Across

2. What molecule can be bonded to form a polymer

5. What molecule carries genetic information

7. What is composed of monomers

8. What is the basic unit of carbohydrates

11. What consist of one or more long chains of amino acid residues

12. What is a large molecule composed of many repeated subunits

13. What is the region of an enzyme where substrate molecules bind and undergo a chemical reaction

Down

1. what are organic compounds containing amine

3. What is another word for fatty acids

4. What consist of carbon, hydrogen and oxygen atoms

6. What is made during photosynthesis from water and carbon dioxide

9. What is consumed during a catalytic or enzymatic reaction

10. What accelerates chemical reactions
