

Name: _____

Date: _____

Cells!

Across

- 2. Break down material for cell to reuse
- 4. Jelly like substance that supports and protects the organelles
- 5. Stores DNA and controls cell activity
- 7. Transports protein from ER to Golgi body
- 10. Make glucose through photosynthesis

- 11. Produces energy from glucose

- 13. Helps organelles move through cell

- 14. Controls movement in and out of the cell

Down

- 1. Provides support and protection for the cell

- 3. Store water, nutrients, and waste

- 6. Produce protein

- 8. Site of lipid production Hint: there is an abbreviation at the end

- 9. Packages and ships protein

- 12. Site of protein production Hint: there's an abbreviation at the end
