

Name: _____

Date: _____

Cells!

Across

- 2. Break down material for cell to reuse
- 4. Jelly like substance that supports and protects the organelles
- 5. Stores DNA and controls cell activity
- 7. Transports protein from ER to Golgi body
- 10. Make glucose through photosynthesis

11. Produces energy from glucose

13. Helps organelles move through cell

14. Controls movement in and out of the cell

Down

1. Provides support and protection for the cell

3. Store water, nutrients, and waste

6. Produce protein

8. Site of lipid production Hint: there is an abbreviation at the end

9. Packages and ships protein

12. Site of protein production Hint: there's an abbreviation at the end
