

Ch. 12 Vocabulary

Across

6. A bar, area, dot, slice, or other symbol in a chart that represents a single data point or value that originates from a datasheet cell

10. A box that identifies the patterns or colors that are assigned to the data series or categories in a chart

11. A field that is assigned a category orientation in a PivotChart report

12. Related data points that are plotted in a chart and originate from datasheet rows or columns

13. the summarized data that's calculated from the data fields of a source list or table

14. Entire chart and all its elements

Down

1. A sheet in a workbook that contains only a chart

2. A chart that is placed on a worksheet rather than on a separate chart sheet

3. A line bordering the chart plot area used as a frame of reference for measurement

4. Descriptive text that is automatically aligned to an axis or centered at the top of a chart

5. In a 2-D chart, the area bounded by the axes, including all data series. In a 3-D chart, the area bounded by the axes, including the data series, category names, tick-mark labels, and axis titles

7. A tiny chart in the background of a cell

8. A label that provides additional information about a data marker

9. Used to record progress or development
