

Ch 5: Photosynthesis

Across

- 4. Gas exchange occurs at leaf pores called?
- 5. Each chloroplasts contains several stacks of membranes called?
- 8. Overall, the _____ are light, water, and carbon dioxide
- 9. A stack of thylakoids is called?
- 10. The organelles of photosynthesis

Down

- 1. Is the process of converting light energy into chemical energy?
- 2. Is a large protein structure in the thylakoid membrane?
- 3. Absorbs the light energy and transfers it
- 6. Strikes the first photosystem
- 7. Overall, the _____ are oxygen and sugar
