

Ch 5 Review

Across

- 2.** A facility that provides a more homelike environment for labor and delivery
4. A condition that results from not having enough red blood cells
9. The birth of a baby
11. A form of diabetes that occurs only during pregnancy. If left untreated, gestational diabetes can cause the baby to be heavier than is normal or healthy
13. A protein present in most people's red blood cells. A mother's blood is tested for this protein to determine if it is positive or negative in order to protect fetus
15. An expense that can be changed such as food costs, household items, clothes, and entertainment

- 16.** Time taken off work by a mother after the birth of a baby
17. A condition characterized by high blood pressure and the presence of protein in the mother's urine
19. A condition in which bones become fragile and break easily

Down

- 1.** A doctor who specializes in treating children
3. An enzyme that helps digest
5. Having a condition in which milk products cause symptoms such as abdominal pain and gas
6. A doctor who specializes in pregnancy and childbirth

- 7.** A plan for reducing pain and fear during the birth process through education, and the use of breathing and conditioning exercises
8. Time taken off work by the father after a baby's birth
10. A payment that generally cannot be changed, such as bills, housing payments, and taxes
12. A mixture of milk or milk substitutes, water, and essential nutrients fed to babies
14. A professional trained to assist women in childbirth
18. The process in which the baby gradually moves out of the uterus and into the vagina to be born
