

# Ch 5 Vocab

## Across

3. colonies of bacteria that adhere together and adhere to environmental surfaces
6. capable of destroying ringworm
7. round shaped bacteria that appear singly or in groups
12. chemical products approved by the EPA designed to destroy most bacteria (excluding spores), fungi, and viruses on surfaces
16. short, rod shaped bacteria
20. reaction due to extreme sensitivity to certain foods, chemicals, or other normally harmless substances
22. known as barbers itch, inflammation of the hair follicles caused by a bacterial infection from ingrown hairs
24. a disease that breaks down the body's immune system. caused by the human immunodeficiency virus
26. transmission of blood or body fluids through touching, kissing, coughing, sneezing and talking
27. also known as communicable disease, a disease that is spread from one person to another person
28. immunity that the body develops after overcoming a disease, through inoculation, or through exposure to natural allergens

29. showing no symptoms or signs of infection

## Down

1. capable of destroying bacteria
2. chemical germicide formulated for use on skin; registered and regulated by the Food and Drug Administration
4. the presence, or the reasonably anticipated presence, or blood of other potentially infectious materials on an item's surface or visible debris or residues such as dust, hair, and skin
5. disease-causing microorganisms carried in the body by blood or body fluids
8. single cell organisms that grow in irregular masses that include molds, mildews, and yeasts; can produce contagious diseases such as ringworm
9. slender, hair like extensions used by bacilli and spirilla for locomotion (moving) may also be referred to as cilia
10. the division of bacteria cells into two new cells called daughter cells
11. bacteria capable of producing a protective coating that allows them to withstand very harsh environments

13. a mechanical process using soap and water or detergent and water to remove all visible dirt, debris, and many disease-causing germs

14. a chemical process that destroys most, but not necessarily all, harmful organisms on environmental surfaces
15. determination of the nature of a disease from its symptoms and/or diagnostic tests
17. one celled microorganisms that have both plant and animal characteristics
18. the ability to produce an effect
19. contact with non-intact skin, blood, body fluid, or other potentially infectious material that is the result of the performance of an employee's duties
21. an abnormal condition of all or part of the body, or its systems organs
23. also known as chelating detergents, break down stubborn films and remove the residue of pedicure products
25. spherical bacteria that grow in pairs and cause diseases such as pneumonia
