

Ch. 8

Across

4. an increased number of immature erythrocytes in the blood
5. protein substance in the blood that is essential to the clotting process
8. fluid that is circulated through the lymph vessels
12. a group of leukocytes without granules in their nuclei
14. any neoplastic disorder of lymph tissue
16. process of disease protection induced by exposure to an antigen
17. blast/o
18. morph/o
19. thromb/o

20. protects the body from harmful invading substances

21. chyl/o

22. reticul/o

23. presence of red blood cells of unequal size

25. HGB stands for

26. cyt/o

28. pathologic examination of bone marrow tissue

29. presence of large red blood cells

30. removal of spleen

Down

1. Rh +

2. transport oxygen and carbon dioxide

3. liquid portion of the blood that remains after clotting

6. pale in color

7. Rh -

9. PT stands for

10. increased number of erythrocytes and hemoglobin in the blood

11. PLT stands for

13. a decreased number of neutrophils

15. breakdown of the red blood cell membrane

24. lymph/o

27. chromat/o
