

Chapter 12 Excel

Across

2. A chart placed on a worksheet rather than on a separate worksheet
6. The area bounded by axes in a chart
9. A graphical representation of numeric data in a worksheet
11. A bar, area, dot, slice, or other symbol in a chart that represents a single data point or value that originates from a worksheet cell
13. A highly configurable table that condenses large amounts of data.

14. A row or column of data represented by a line, set of columns, bars, or other chart types

Down

1. A sheet that contains only a chart
3. The entire chart and its elements
4. A graphical representation of the data in a PivotTable
5. Text that provides additional information about a data marker, which represents a single data point or value that originates from a worksheet cell

7. An explanatory list that identifies the patterns or colors assigned to the data series or categories in a chart

8. Descriptive text that is aligned to an axis or at the top of a chart

10. Miniature graphs that summarize data; typically used to graphically describe trends in data

12. A line bordering the chart plot area used as a frame of reference for measurement
